Schedule

Submission Guidelines

NEXT Hackathon

36 hours. Over \$200K in prizes, credits, and resources. Top 5 demo live on the SuperAI WEKA Stage.

NEXT Hackathon is SuperAI's flagship hackathon — 200 builders, equipped with the tools, mentors, and network to go from idea to working demo in a single sprint. The top 5 teams demo live on the WEKA stage at SuperAI, in front of 10,000 attendees.

The Theme

Build anything — but make it agentic.

We don't care what problem you solve. We care how your agents solve it. This hackathon is about pushing the frontier of autonomous systems. Your project can tackle any domain — productivity, finance, healthcare, creative tools, infrastructure, whatever — as long as agents are doing real work at the core of it.

The Stack

A production-ready agent needs infrastructure to run on, a frontend users can reach, access to live information, and the ability to take real-world actions. We've partnered with four tools that cover each of these layers — with free credits, hands-on workshops, and mentors on the floor throughout the hackathon.

- **AWS** — Cloud infrastructure for your backend. Run compute, storage, databases, and managed AI services. Every team gets a temporary AWS account with full service access, plus 500 Kiro credits.
- **Vercel** — Frontend deployment and AI tooling. Deploy your UI, use v0 to generate interfaces, and route LLM calls through the Vercel AI Gateway. \$30 in v0 credits per team + \$15 in credits for Vercel gateway.

- **Stripe** — Payments and financial workflows. Charge users, run subscriptions, or trigger payouts directly from your agent. \$250 in credits per team.

Prizes

You will submit one project but there are many ways to win. The awards are designed to stack, so a single build can take home more than one prize.

Top 5 Overall Projects

The five strongest projects demo live on the WEKA stage at SuperAI in front of 10,000 people. Finalists ship a real, working product live on stage, which means a deployed app running on AWS and Vercel.

⚠️ To qualify for Top 5, your submission must:

1. **Demonstrate direct AWS infrastructure deployments** using your provisioned AWS sandbox account. Judges will verify that your agents are running on AWS services (compute, databases, AI/ML endpoints, etc.) — not just calling external APIs.
2. **Integrate at least one of the following Vercel products:**
 - AI Gateway
 - AI SDK (Sandbox)
 - AI SDK (Workflows)

Every finalist team receives:

- **AWS** — \$25,000 in AWS credits [[terms apply](#)]
- **Vercel** — \$1,500 in v0 credits
- **Razer** — a gift bag per team member (~\$500 value): ProClick v2 Mouse, Pro Glide XXL Mousemat, and Pro Type Ergo keyboard

Best use of Exa

Awarded to the team that most effectively uses Exa for agent intelligence, search, or real-time data access. Open to all submissions — you do not need to be a Top 5 finalist to win. Winners

Top 3 teams each receive \$1,500 in Exa credits

Best use of Stripe

Awarded to the top three teams that best demonstrate depth of Stripe integration, innovative monetization strategies with high growth potential, and a polished, compelling demo. Open to all submissions. Winners are selected by the Stripe team.

Top 3 teams each receive \$1,000 in Stripe credits

Important Note

A single project can win across multiple awards. A Top 5 finalist can also take home the Exa and Stripe awards. We'd love to see one team sweep all three.

Judging Criteria

Submissions are evaluated across these dimensions:

- **Agent Overview** — What agent(s) did you build? What is their purpose?
- **Autonomy & Decision-Making** — How does your agent decide what to do next? What reasoning, planning, or tool-use patterns does it employ?
- **Actions & Tool Use** — What actions can your agent take? What tools/APIs/environments does it interact with?
- **Orchestration** — If multi-agent: how do your agents coordinate, delegate, or communicate?
- **Human-in-the-Loop (if any)** — Where does a human intervene, approve, or override?
- **Failure Handling** — How does your agent recover from errors or unexpected states?
- **Demo & Presentation** — Clarity of the pitch, quality of the demo/product, and how well the team communicates what they built.

Schedule

Day 1 — 9 June

- 9:00am — Registration + Breakfast

- 10:15am — AWS Workshop
- 10:45am — Vercel Workshop
- 11:15am — Stripe Workshop
- 11:35am — Exa Workshop
- 12:00pm — Hacking begins
- 1:00pm — Lunch
- 7:00pm — Dinner
- 12:00am — Midnight snack

Day 2 — 10 June

- All day — Hacking continues / SuperAI Day 1 begins
- 7:00pm — Dinner
- 11:59pm —  Project submissions due + Supper

Breakfast, lunch and coffee are available during conference hours (7:30am to 6pm) at SuperAI conference on Level 5.

Day 3 — 11 June

- 12:00pm — Top 5 finalists announced + Open mic
- 5:30pm —  Top 5 finalist demos + prize announcements on WEKA stage + group photo

What You Get

Credits

On day one you will get access to the following:

- AWS — temporary AWS accounts with full service access + \$500 Kiro credits
- Vercel — \$30 in v0 credits per team

- Exa — \$100 in credits per team
- Dify — 1-month subscription to Dify Pro

Hardware

- Razer — keyboard, mouse, mousemat and headset on every table

The room

The hackathon room is built to keep you in the zone for the full 36 hours:

- All meals catered — breakfast, lunch, dinner, and supper
- Snacks, drinks, and hot coffee all day
- Bean bags and rest areas

You also get full conference access to SuperAI (10-11 June)

Submission Guidelines

Deadline: 12:00am on 11 June (i.e. Submit by 11:59pm on 10 June). No late entries allowed.

What to submit — every team includes:

1. **GitHub repo** — public, or with judge access granted
2. **Project link** — live URL or hosted demo
3. **Presentation slides** — Google Drive link to a .ppt or .keynote file (see notes below)

A note on presentation slides — used if you're selected as a Top 5 finalist and pitch on the WEKA stage:

- Format must be .ppt or .keynote. Google Slides / Gamma / Vercel page links are not accepted — they won't play reliably on stage.
- If you want to showcase your demo in action, use a screen recording. Live demos are prohibited to avoid technical errors on stage. If you demo includes screen recordings, embed the video directly in your slides. Do not link to YouTube or external video.

- Slides are locked at submission. No changes after the deadline, so make sure your deck is stage-ready before you submit.

Teams

Teams can be 1–4 members. Solo entries are welcome, but we strongly recommend forming a team. 36 hours goes fast, and a great idea needs hands to build it.
